

Welpol Contract Cleaning Environmental and Sustainability

Policy

2024

Welpol Contract Cleaning (Welpol) seeks to undertake its activities in an environmentally responsible and sustainable manner and to do all it can to minimise any detrimental impact on the environment. The main focus of this policy is in the packaging, supply and use of cleaning chemicals and equipment which is why we have partnered with Fenn's as our national supplier and distributor.

Part 1: Statement of Intent

Our Environmental and sustainability policy aims to:

- Prevent environmental harm or pollution incidents at all our sites by ensuring our working practices comply with all relevant legislation.
- Dispose of all cleaning waste using licensed waste contractors.
- Minimise and recycle waste where possible.
- Minimise energy use and utilise greener and renewable energy sources. Ensure our premises are well insulated and our appliances are regularly serviced to maintain maximum efficiency. Switching off lights when rooms are not in use and switching off computer monitors, printers etc at the end of use.
- Encourage the use of video conferencing to reduce travel and support Carbon Net Zero target.
- Ensure that all staff are aware of our environmental standards and encourage active participation in environmental programmes.
- To work only with product and equipment suppliers that have robust environmental policies in place
- To review and revise this policy on an annual basis.

Part 2: Cleaning products and packaging

Our national product and equipment supplier, Fenn, have a comprehensive and robust sustainability strategy in place which can be viewed by clicking on the image below
